

GLAESER *clean*

Your trusted experts for industrial cleaning, workplace hygiene and personal protective equipment.

PRODUCT CATALOGUE EDITION 05

GLAESERclean, a division of the GLAESER Group

With over 600 employees at 16 locations!

The **GLAESER Group**, headquartered in Ulm, Swabia, has been active in textile production since 1888. For more than a century, we have been manufacturing in the region, building up solid expertise in the production of textile raw materials. With this long-standing experience and constant drive for innovation, we ensure the highest production quality and safeguard jobs in Germany.

We are both a go-to destination for sewing and fabric enthusiasts as well as a strong partner for industrial clients. At the same time, we consider it our responsibility to treat our ecosystem sustainably. By processing and recycling textile waste, we conserve natural resources and offer environmentally friendly alternatives with our recycling products.

GLAESERclean offers a comprehensive range of products for complete workplace hygiene in industrial, gastronomy, kitchen, and washroom areas. Our portfolio includes high-quality hygiene products under our own brand fairpaper®, such as industrial wiping cloths and rolls, folded hand towels, hand towel rolls, napkins, and toilet paper.

Our goal is to deliver the optimal cleaning and hygiene solution for every requirement across manufacturing, industry, municipalities, trades, gastronomy, and the food sector.

Benefit from our experience and get expert advice from our specialists. Together, we will find the optimal solution tailored to your individual needs.

This is us:

Experts in cleaning and washroom hygiene

We see ourselves as specialists in workplace and washroom hygiene. Whether it's new planning, renovation, or replacement: our product portfolio meets the highest hygiene standards, is designed for efficient cleaning, and features a modern design.

High-quality products for diverse applications

Our products provide innovative solutions for industry, workshops, laboratories, and kitchens – ideal for maximum dirt absorption, maintaining spotless surfaces, and polishing metal and coated surfaces.

We are the exclusive partner of Chicopee in Germany

Benefit from a strong partnership and unique product expertise. In Chicopee products, fibers are combined in such a way that their specific properties optimally support professional applications.

Renowned brands & „Made in Germany“

We complement our product range with renowned brands. For us, "Made in Germany" is synonymous with reliability and high product quality. In our product range management, we place great importance on sustainability and resource efficiency.

Warehousing & delivery

We maintain extensive on-site storage to ensure fast and flexible order processing and delivery. Our logistics team ships goods quickly and reliably to the desired destination.

Private labeling on request

We understand the importance of brand identity! If you would like to have products individually branded, just get in touch with us!

Cleaning, caring, polishing – our product range at a glance

Industrial paper rolls

Industrial paper rolls, blue and white 02 – 03

Nonwoven special wipes and textile cleaning cloths

WipeClean Strong, WipeClean Ultra, WipeClean wipes 04 – 05

Maracel® airlaid wipes, polishing wipe roll, PP-TEX cleaning wipes 06

Lofcel® nonwoven care wipes 07

GLAESER-tex cleaning rags (reclaimed material) 08

GLAESER-tex cleaning rags (new material), Sealer-Wipe 09

Chicopee Dura Wipe, Veraclean Critical Cleaning Plus 10

Veraclean Polish Plus, Cartex Solvent Plus 11

Veraclean I-Tack, Veraclean Soft Plus 12

Veraclean Cleanroom, Chicopee Lavette Super® 13

Microfiber cloths, four-color code 14

Multipurpose cleaning wipes, WipeClean Power Rags 15

Hygiene paper products

Folded hand towels 16

Paper hand towel rolls 17

Toilet paper, jumbo toilet paper 18 – 19

Facial tissues, Fairpaper kitchen roll 19

Personal protective equipment

Disposable protective coveralls ProtectPro1, ProtectPro2, ProtectPro2+ 21 – 23

Disposable overshoes, disposable arm sleeves 24

Equipment and protective covers

Robo-Protec robot protective suits 25

Protective fleece, polyester protective fleece, stair protection fleece, oil absorbent fleece 26 – 27

Floor and Wall Holders 28

Accessories: waste bags and sacks 29

Hand soaps, hand cleaning pastes, and cleaning agents

Cream soap, hand cleaning pastes, foam soap cartridges, body & hair shower gel 30 – 31

Cleaning agents – affordable and reliable quality 32

Accessories: urinal and bedpan blocks, air freshener canisters, cleaning accessories 33

Washroom equipment

Soap dispenser systems 34

Dosing dispensers, dispensers for hand washing paste, waste bins 35

Hand towel roll dispensers, paper hand towel dispensers 36 – 37

Toilet paper dispensers, jumbo roll dispensers, double-roll WC paper dispensers 38 – 39

Toilet seat disinfectant, dispensers for facial tissues 39

Washroom accessories:

hygiene bags and dispensers, air fresheners and cartridges, toilet brush with floor stand 40

Disinfection

Hand disinfectants, disinfectant wipes 41

Napkins 42 – 43

Space for notes, general terms & conditions 44 – 45

Industrial paper rolls

Industrial paper rolls, blue

Made of absorbent paper, ideal for cleaning and degreasing tools and work surfaces in metal processing, paint shops, and food production areas.

- made from cellulose pulp
- volume embossed
- glued
- grippy
- absorbent
- low-linting

Nonwoven wipes and wiping rolls

WipeClean Strong

These wipes and rolls are characterized by very high tear resistance – even when wet. They are solvent-resistant, low-lint, highly absorbent, and especially effective on oils and greases due to their PP content. Typical applications: Mechanical engineering, automotive industry, steel industry.

- volume embossed „honeycomb pattern“
- extremely low-linting
- highly tear- and wet-resistant
- resistant to solvents
- very high absorbency

Item No. / Description / Specifications	Dimensions (W x L)	Quantity	Unit	Pallet

All specifications are approximate.

WipeClean Ultra

The silicone-free rolls contain a high polyester content, making them extremely tear-resistant, solvent-resistant, low-lint, and highly absorbent, particularly effective on oils and greases. Fields of application: Automotive industry, mechanical engineering, aircraft construction, print industry.

- white or turquoise
- creped or plain
- solvent-resistant
- lint-free
- silicone-free
- extremely tear-resistant

Item No. / Description / Specifications	Dimensions (W x L)	Quantity	Unit	Pallet
480043 WipeClean Ultra, creped turquoise, 55% pulp, 45% PET, approx. 69 g/m ²	32 x 38 cm	500 sheets/roll	1 roll	72 rolls
480022 WipeClean Ultra, smooth turquoise, 55% pulp, 45% PET, approx. 69 g/m ²	30 x 38 cm	500 sheets/roll	1 roll	72 rolls
480023 WipeClean Ultra, smooth white, 55% pulp, 45% PET, approx. 69 g/m ²	30 x 38 cm	500 sheets/roll	1 roll	72 rolls

WipeClean

High-quality cleaning and drying wipes made of cellulose fibers with a latex binder, double-creped. Ideal for cleaning and drying sensitive surfaces such as glass, ceramics, or stainless steel. Typical applications: laboratories, pharmaceutical, glass, and printing industries, food processing.

- soft and elastic
- colour: White
- very high absorption speed
- resistant to solvents
- extremely low-linting

The crepe structure makes the cloth particularly stable for wet and dry cleaning.

Lofcel, WipeClean, and Airlaid wipes are converted and packaged within the GLAESER Group.

This allows us to ensure consistent quality and sustainable resource management at a high level, while also making special sizes possible.

Maracel® airlaid wipes

Air-cushion embossed airlaid quality made of 100% cellulose, highly voluminous. Rapid absorption of liquids. Suitable for contact with food. Areas of applications: laboratories, hospitals, in food, metal and electrical industries.

- 100% cellulose
- „double-S“ embossing
- highly voluminous
- high absorbency
- very low-linting
- good wet-strength

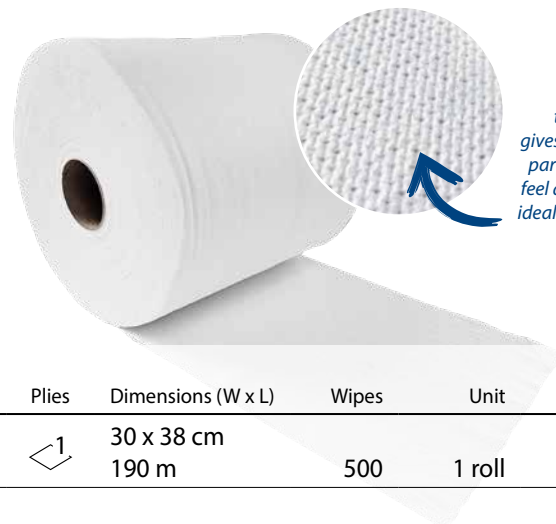

Item No. / Description / Specifications	Plies	Dimensions (W x L)	Wipes	Unit	Pallet

Additional items on request!

Polishing wipe roll

Polishing roll made of 100% viscose. Featuring the typical apertured structure, it feels like cotton. Can be used dry as a polishing cloth for delicate surfaces. When used wet, it is highly efficient as a cleaning cloth for vehical interiors and as an industrial wiping cloth for absorbing solid and liquid substances from sensitive surfaces. Applications: Precision engineering, automotive industry, paint shops, hospitals, nursing homes, large-scale kitchens.

- extremely soft
- apertured structure
- textile character
- resistant to solvents
- very tear-resistant

Item No. / Description / Specifications	Plies	Dimensions (W x L)	Wipes	Unit	Pallet
480110 Polishing wipe roll, white	1	30 x 38 cm 190 m	500	1 roll	56 rolls

PP-TEX cleaning wipes

The exceptionally lint-free meltblown quality (100% polypropylene) is available both as a roll and as a single wipe. The PP-TEX material remains stable even under very wet conditions and is wringable, allowing repeated use. It enables easy removal of stubborn dirt such as oils, greases, liquid glue, or solvents. Ideally suited for paint shops, industrial workshops, the metal industry, and the automotive sector.

- 100% polypropylene (meltblown)
- tear-resistant
- remarkable wet-strength
- wringable
- silicone-free
- solvent-resistant

Item No. / Description / Specifications	Plies	Dimensions (W x L)	Wipes	Unit	Pallet
480009 Wipe roll, blue, PP-TEX	1	32 x 36 cm 180 m	500	1 roll	48 rolls
480011 Cleaning wipe, blue, PP-TEX	1	33 x 37 cm	24 x 25 = 600	1 box	20 boxes

All specifications are approximate.

Needle-punched cotton cloths

Textile, extra-strong cloths made from recycled cotton/synthetic blend fibers from the textile industry, that unfold their further use in upcycling. Suitable for absorbing metal shavings and for cleaning sharp edges and uneven surfaces, which is not feasible with conventional paper towels. Due to the cotton content, the cloths are highly absorbent, tear-resistant, and reusable multiple times. Applications: automotive repair shops, metal industry, and paint shops.

- absorbs oil, grease, and lubricants
- cotton/synthetic blend fibers
- dark mixed colours, light mixed colours, white

Item No. / Description / Specifications	Dimensions (W x L)	Wipes	Unit	Pallet
453503 Needle-punched cotton cloths Quality: white	38 x 40 cm	approx. 450	1 bale at 10 kg	30 bales

410179 Terry stretch, mixed colors, reclaimed material, terry fabric	1 bale à 25 kg	12 bales

Polishing linen fabric:

Recycled from bed linen. It is durable, low-lint, and ideal for fine polishing work.

Calico fabric:

Made primarily from used shirts cut to cloth size. It features smooth surfaces and good tear resistance.

Jersey fabric:

Made from knitted, mostly T-shirt materials. It is absorbent, elastic, and soft – ideal for delicate surfaces.

Terry stretch fabric:

High-pile fabric made from recycled fitted sheets. It is elastic, highly absorbent, and very soft – perfect for cleaning sensitive surfaces

Speed, Availability, Reliability – directly from our warehouse

Our efficiently organized warehousing offers you numerous advantages: **fast availability, short delivery times,** and a **wide product selection.**

Thanks to our extensive storage capacities, you can order flexibly and according to your needs. Optimized processes ensure the highest quality and the best possible protection of your goods. In addition, you benefit from attractive terms for larger order quantities. Rely on dependable and prompt delivery.

GLAESER-tex Cleaning rags – new material

The base material of these cleaning rags comes from textile industry production surpluses, therefore without seams. Packaging is done on Euro pallets (height approx. 120 cm).

- sorted by quality and color
- upcycling product
- universally applicable

All specifications are approximate.

Item No. / Description / Specifications	Unit	Pallet
439018 Cotton Jersey, new material, bleached, white	1 bale à 10 kg	30 bales
439048 Cotton Jersey, new material, raw white	1 bale à 10 kg	30 bales
439208 Cotton Jersey, new material, mixed colors	1 bale à 10 kg	30 bales

Sealer-Wipe

Sealer-Wipe is the perfect lint-free wiping cloth for body-in-white construction, seam sealing, engine assembly, cleaning and final finishing, maintenance, and removal of paints and PVC pastes.

- 100% polyester
- thickness: 135 g/m², 178 g/m²
- knitted
- low-lint
- grease- and silicone-free
- solvent-resistant
- absorbent
- edges ultrasonically sealed
- white

Item No. / Description / Specifications	Dimensions (W x L)	Unit	Pallet
480201 Sealer-Wipe, approx. 135 g/m ²	40 x 40 cm	10 kg bag individually packaged	180 kg

The four-color code in cleaning:

Blue: General surfaces (e.g., furniture, offices)

Green: Kitchen area (e.g., work surfaces, appliances)

Yellow: Sanitary area (e.g., sinks, showers, tiles)

Red: Sanitary area (e.g., toilets, urinals)

The 4-color system in cleaning is a method that uses different colors to identify cleaning areas. This improves hygiene and increases efficiency.

- Improved hygiene: Reduces the risk of germ transmission between different areas.
- Increased efficiency: Clear allocation of cleaning materials saves time and effort.
- Easy to use: The system is easy to understand and implement.
- Professional appearance: Shows that a company values cleanliness and hygiene.
- Minimization of cross-contamination: Separating areas prevents the spread of germs.
- Training and standardization: Using the system makes it easier to train new staff and helps maintain cleaning standards.

Microfiber cloths

Suitable for wet or dry cleaning of all surfaces. Can be used as an all-purpose cloth. Suitable for polishing delicate items or picking up dust. Ideal for facility management, paint shops, catering, canteens, and industry. Color-coded (blue, yellow, red, and green).

- standard classic
- quality border stitching
- versatile
- washable
- size 40x40 cm
- 280 g/m²

Personal Protective Equipment

Symbol specifications

Spray-tight Protective Suits

Type 4 EN 14605

Spray-tight protective clothing provides protection against chemical spray mist.

Mist-Resistant Protective Suits

Type 6 EN 13034

Offers limited protection against liquid mist and splashes, not suitable for full liquid protection.

Protective Clothing Against Infectious Agents

Type 4B, 5B, 6B EN 14126

Requirements and test methods for protective clothing against infectious agents.

Chemical Protective Clothing

Type 6 EN 13034-6

Protection against light chemical splashes at low pressure.

Protective Clothing Against Radioactive Contamination

Type 5B EN 1073-2:2002

Part 2: Requirements and test methods for non-ventilated protective clothing against radioactive contamination from solid particles.

Electrostatic Properties

EN 1149-1

Part 1: Test method for surface resistance measurement.
Part 3: Test method for charge decay measurement.
Part 5: Requirements for material and design.

Dry Particle Protection Suits

Type 5 EN ISO13982-1

Protective clothing – Protection against solid particles – Part 1: Protection against airborne solid particles.

In Europe, personal protective equipment (PPE) must bear the CE marking and meet the applicable standards' requirements. These standards address protection against various types of hazards

ProtectPro 1 Disposable protective coverall

Category III, type 5+6

Our ProtectPro 1 protective coverall is a high-quality, breathable, and antistatic disposable suit made from white or blue, four-layer SMMS material* (spunbond, meltblown, meltblown, spunbond non-woven fabric). It provides protection against chemical particles, while the SMMS material ensures an excellent wearing comfort. Potential industries: Construction, agriculture, maintenance companies, nuclear power plants, food and cosmetics industries.

General terms and conditions of sale and delivery

I General

1. Delivery contracts between the seller and the buyer shall only be concluded if the seller has confirmed the delivery contract in writing.
2. Amendments or additions to the agreements made require the written confirmation of the seller to be effective.
3. These terms and conditions of sale and delivery shall also apply if the buyer has communicated or communicates its own general terms and conditions of delivery that deviate from the seller's terms and conditions or if these are printed on the buyer's documents, in particular on order forms. Counter-confirmations by the buyer with deviating terms and conditions are hereby rejected.
4. Should any of these terms and conditions be invalid, this shall not affect the validity of the other terms and conditions of sale and delivery.
5. The place of performance and exclusive place of jurisdiction is Ulm.
6. These terms and conditions of sale and delivery shall also apply to all future purchases, unless other terms and conditions of delivery are applied by the seller.

II. Delivery

1. No guarantee is given for compliance with delivery deadlines, unless otherwise agreed in individual cases. Delivery deadlines accepted by the seller shall be extended by the period during which the buyer is in default with its obligations arising from any contract concluded with the seller.
2. In cases of strikes, lockouts, operational disruptions, force majeure, and other impediments for which the seller is not responsible, the seller shall be entitled to postpone delivery for the duration of the impediment or to withdraw from the contract in whole or in part without the buyer being entitled to claim damages or demand subsequent delivery.
3. The buyer may not reject partial deliveries.

III. Shipping and transfer of risk

1. The seller shall have sole discretion in choosing the shipping method and means of transport. Shipping shall be at the buyer's expense.
2. For all deliveries – including carriage paid deliveries – the risk of transport shall pass to the buyer at the point in time at which the seller delivers the goods to the federal railway or the carrier.

IV. Complaints

1. Complaints by the buyer must be reported to the seller immediately, at the latest within one week of receipt of the delivery, by registered letter.
2. Warranty claims are excluded if the buyer processes or sells the goods after discovering or should have discovered the defect, unless he can prove that the processing or sale was necessary to prevent greater damage.
3. In the case of justified, properly reported defects, the seller is only obliged to replace the goods or, if this is not possible, to take them back and refund the purchase price. This is subject to the condition that the goods are still in the same condition as when they were delivered. If the buyer proves that he has further processed or sold the goods without violating his obligation to give notice of defects, he may demand a reduction in the purchase price for this part of the goods. Further claims are excluded.
4. Returns are only permitted with the express consent of the seller and must be made carriage paid.

V. Payment

1. The purchase price is due 30 days after the invoice date.
2. In the event of late payment, default interest shall be charged at a reasonable rate, at least 2% above the respective discount rate of the Deutsche Bundesbank.
3. If the buyer defaults on its payment obligations arising from any business transaction with the seller, or if bills of exchange are protested, or if seizures are made against the buyer, or if there is a significant deterioration in the buyer's financial circumstances, the seller shall be entitled to withdraw from the delivery contract in whole or in part and to demand cash payment for further deliveries. Furthermore, the seller is entitled to immediately withdraw all outstanding acceptances, bills of exchange, and checks from circulation at the buyer's expense.
4. The withholding of payments due to any claims of the buyer not recognized by the seller is excluded, as is the offsetting of any claims.

VI. retention of title

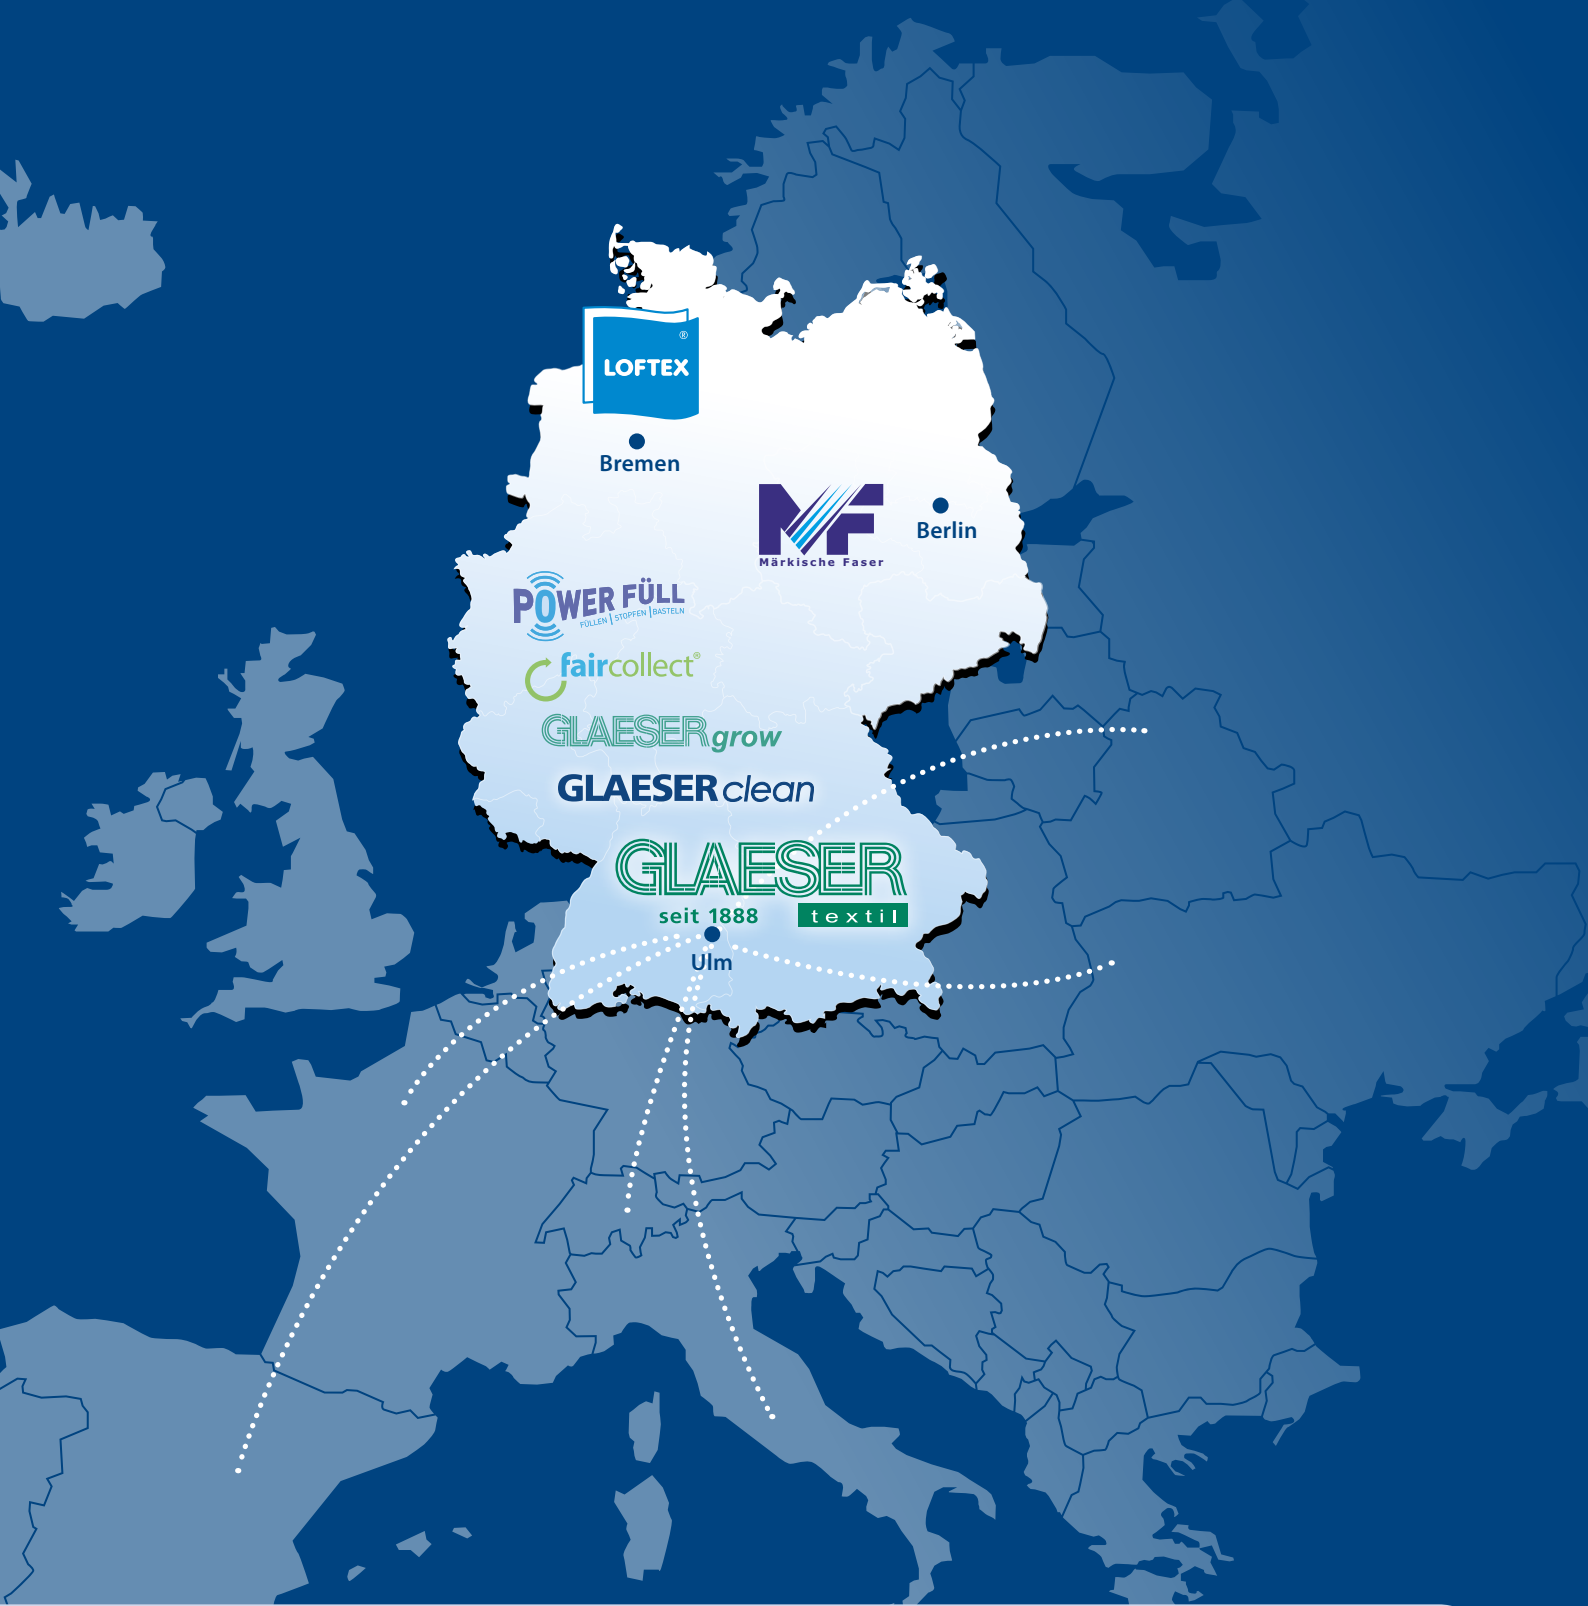

1. The goods remain the property of the seller until all claims of the seller against the buyer arising from the joint business relationship, including future claims, have been paid in full.
2. The buyer may only sell the goods subject to retention of title in the ordinary course of business and may not pledge them to third parties or assign them as security. The buyer must immediately notify the seller of any access to the goods subject to retention of title by third parties.
3. In the event of mixing, blending, or processing of the goods subject to retention of title, the buyer hereby transfers its ownership or co-ownership rights to the new goods to the seller and undertakes to store them for the seller with commercial care.
4. The buyer's claims from the resale of the goods subject to retention of title are hereby assigned to the seller as security, regardless of whether the goods are resold to one or more customers, and regardless of whether they are resold unprocessed or processed. In the event that the goods subject to retention of title are sold by the buyer unprocessed or processed together with other goods not belonging to the seller, the assignment of the purchase price claim shall only apply to the value of the seller's goods. The buyer is revocably authorized to collect the claims from the resale. At the seller's request, the buyer must inform the debtors of the assigned claims and notify the debtor of the assignment.
5. If the value of the securities provided to the buyer exceeds the buyer's total claims by 20%, the buyer undertakes to release the excess securities at the buyer's request.
